# TAKE CARE / WASH WITH CARE

## 14 GREAT LAUNDRY TIPS

A collection of our best laundry tips before and after washing to maintain your garment's fit, extend its lifespan and reduce resource consumption.

### General laundry tips

#### 1. Avoid unnecessary washing

Wear your clothes one more time. Avoid unnecessary washing that wears out clothes and thus shortens their lifespan.

#### 2. Air out the clothing

Feel free to air out your clothes instead of washing them, if they are not dirty, then they will last longer.

#### 3. Check the care label in your clothing

The care label indicates how the clothes are best cared for, washed and dried to preserve their quality and lifespan.

#### 4. Fill the washing machine

Fill the washing machine as much as possible and minimise the use of water, electricity and detergent.

### Advice before washing

#### 5. Sorting

Wash the clothes with similar colours to avoid bleeding of colours in the washing machine.

#### 6. Turn inside out

Turn clothes inside out. Close zippers and buttons when washing or tumble drying to keep clothes longer.

#### 7. Choose the right detergent

Choose eco-labelled detergent as it is economical in use and beneficial for both the clothing and the environment.

#### 8. Dosage

Dose detergent correctly and according to water hardness. Too much washing powder does not make clothes cleaner, but leaves soap residue in clothes.

#### 9. Avoid the following

Bleach, optical brighteners and fabric softener.

#### 10. Lower washing temperature

Turn down the temperature when washing. The washing instructions in the clothes merely indicate a max. temperature.

### After washing

#### 11. Maintain shape

After washing, stretch the clothing into shape before drying it, and it will keep its shape better and shrink less, so you can use the clothes longer.

#### 12. Use the clothesline

It requires less energy consumption and you avoid the clothes shrinking after a round in the dryer.

#### 13. Ironing

Always follow the ironing symbols in the care label located on the inside of your clothing.

#### 14. Clean the washing machine

Clean the washing machine and rubber strips after each wash, remove old soap from the soap drawer and run a hot wash monthly to avoid bad odours.
